Osteospermum SUNNY®

Variety Description 2011-2012

<p>Sunny® Classic AISHA</p>	<p>Flower: The flower is amber with a slight rose circle near the eye which is orange-brown. The reverse is burned orange. The flowers are medium-sized approx. 6 cm in diameter and a good shelf life.</p> <p>Growth: A very compact plant with good branching. Needs little to medium retardation. Small ruffled leaves.</p> <p>Time of production: Medium.</p>
<p>Sunny® Classic ASTI</p>	<p>Flower: Bright yellow flower with a yellow/green eye. The reverse of the flowers is striped in brown and yellow. The flowers are medium-sized approx. 6 - 7 cm in diameter and a good shelf life.</p> <p>Growth: A healthy compact plant with good branching. Very blooming. Needs little to medium retardation. Dark, slightly ruffled leaves.</p> <p>Time of production: Medium.</p>
<p>Sunny® Classic</p>  <p>BACIA</p>	<p>Sunny® Classic BACIA</p> <p>Flower: In the beginning the flower is light rose with a beautiful dark brown eye. During a few days the whole flower is turning dark rose. A good complement to the pink/rose varieties. The flowers are medium-sized approx. 5 cm in diameter and a good shelf life. A very good setting of buds and flowers.</p> <p>Growth: Compact growth with good branching. A very healthy plant. Needs a little retardation. Small, slightly ruffled leaves.</p> <p>Time of production: Fast.</p>
 <p>Sunny® Classic BECCA</p>	<p>Sunny® Classic BECCA</p> <p>Flower: The flower is orange-red with a dark- brown eye. The flowers are medium-sized approx. 5,5 cm in diameter and a good shelf life. This plant is a very good alternative to Shiela Imp.</p> <p>Growth: A healthy and compact plant with good branching. Needs medium retardation. Shiny foliage with round slightly ruffled leaves.</p> <p>Time of production: Medium.</p>
 <p>Sunny® Classic BINI</p>	<p>Sunny® Classic BINI</p> <p>Flower: A beautiful lavender flower with dark lilac eye. The flowers are medium-sized approx. 6 cm in diameter and a good shelf life. This is a very good complement to the other lilac varieties.</p> <p>Growth: Good growth with good branching. Needs medium retardation. Small, nice ruffled leaves.</p> <p>Time of production: Medium.</p>

Osteospermum SUNNY®

Variety Description 2011-2012

Sunny® Classic SHIELA IMP.	<p>New improved Shiela. Flower: Red with dark stripes. The tip of the petals turns yellowish. The reverse of the flower is dark red with stripes in brown. Large flower approx. 6-7 cm in diameter and a good shelf life. Good setting of buds and flowers. Growth: Upright growth, a slender plant. Moderate-good branching. Needs medium retardation. Dark green ruffled leaves. Time of production: Medium.</p>
Sunny® Classic PINGO	<p>Flower: Beautiful white flower with beige/yellow eye. The reverse of the flower is white with a slight yellow stripe. Large flower approx. 7,5-8 cm in diameter and a good shelf life. Good setting of buds and flowers. Growth: A compact plant with good branching. Needs a little to medium retardation. Light green slightly ruffled leaves. Time of production: Medium.</p>
Sunny® Classic BELLA	<p>Flower: The flower is rose with yellow at the tip of the petals. A nice yellow eye. The reverse of the flower is striped in dark pink and yellow. Large flower approx. 7 cm in diameter and a good shelf life. Good setting of buds and flowers. Growth: Upright growth, a slender plant. Moderate-good branching. Needs medium to stark retardation, especially in the beginning of the culture. Nice ruffled leaves. Time of production: Medium.</p>
Sunny® Classic CARLOS	<p>Flower: White with purple centre and a dark blue eye. The reverse of the flower is beautiful striped in blue and white. Very large flowers approx. 7, 5 - 8 cm in diameter and with a very long shelf life. Very good setting of buds and flowers. Growth: Compact growth with very good branching. A very uniform plant. Medium retardation. Dark ruffled wavy leaves. A very healthy plant. Time of production: Medium.</p>
Sunny® Classic EVITA	<p>Flower: A new exiting colour in the selection. An almost blue/rose flourishing colour. Starts with white flowers, which turns colour within the first day. Light blue eye. Good long shelf life and good buds and flower settings. Growth: A bit rough leaves in the beginning, but otherwise a good compact plant with good branching. Medium retardation. Time of production: Medium.</p>
Sunny® Classic XENA	<p>Flower: Bicolour pink/white. The flower is very open. Dark blue shining eye. Excellent setting of buds and flowers and good long shelf life. The reverse of the flower is striped in cobber. Growth: Very compact. Be careful with retardation in the middle of the production. Dark ruffled leaves. Medium retardation in the beginning and in the end otherwise light retardation. Time of production: Fast - medium</p>

Variety Description 2011-2012

Sunny® Classic XITA	<p>Flower: Hot pink petals with light blue eye. In the beginning the flower is light, but within 1 - 2 days it becomes really hot pink. The reverse of the flower is striped in cream and brown and is a fantastic contrast to the hot pink front.</p> <p>Growth: Good compact growth. Dark ruffled lightly curved leaves. Excellent branching. Medium retardation.</p> <p>Time of production: Medium.</p>
Sunny® Classic BIANCA	<p>Flower: Starts out in cream and during a short time it turns rose. Later it turns rose/yellow. The reverse of the flower is light yellow with a dark stripe. The flower is approx. 6-6, 5 cm in diameter and has a long shelf life. Very good setting of buds and flowers. Short stems.</p> <p>Growth: Strong growth like Elizabeth. Good branching. Medium to strong retardation. Dark lightly ruffled leaves. A very healthy plant.</p> <p>Time of production: Medium.</p>
Sunny® Classic CAMBRIA	<p>Flower: Dark deep lilac. Good large flower approx. 6, 5-7 cm in diameter with very long shelf life. The reverse of the flower is dark lilac. Good setting of buds and flowers.</p> <p>Growth: Compact growth with good branching. Strong dark green ruffled leaves. Medium retardation.</p> <p>Time of production: Medium.</p>
Sunny® Classic FIONA	<p>Flower: Warm pink. Is light pink in the beginning but turns warm pink gradually. Large flower approx. 6, 5-7 cm in diameter. The reverse of the flower is striped in pink. Good setting of buds and flowers. Short stems.</p> <p>Growth: Upright growth. Slightly ruffled dark green leaves. Medium retardation.</p> <p>Time of production: Medium.</p>
Sunny® Classic DARK AMANDA	<p>Flower: Dark burned yellow, turning lighter in the centre. Very dark almost black eye with orange pollen. The reverse of the flower is dark yellow with stripes in brown. Medium sized flower approx. 6-6, 5 cm in diameter with good shelf life. Excellent setting of buds and flowers. Short stems.</p> <p>Growth: Compact growth. Needs light to medium retardation. Dark green ruffled leaves. Excellent branching.</p> <p>Time of production: Medium.</p>
Sunny® Classic DARK FLORENCE	<p>Flower: Dark orange with dark, almost black eye and orange pollen. The reverse of the flower is dark orange with dark stripes. Large flowers approx. 7-8 cm in diameter with shelf life. Very good setting of buds and flowers. Very large buds.</p> <p>Growth: Compact with good branching. Do not tolerate a too high concentration of CCC. Max. 0, 25 % from under. If CCC is watered on the plants, they have to be rinsed afterwards. Grey green leaves.</p> <p>Time of production: Medium.</p>

Osteospermum SUNNY®

Variety Description 2011-2012

Sunny® Classic VICTORIA	<p>Flower: Spoon-shaped bicolour flower in white and pink. Very interesting plant. Extremely flowering. Medium flower size approx. 6-6, 5 cm in diameter. The reverse of the flower is blue turning into brown. Excellent setting of buds and flowers.</p> <p>Growth: Strong, compact plant with a very good branching. Medium retardation. Medium green and very ruffled leaves.</p> <p>Time of production: Medium.</p>
Sunny® Classic FELIX	<p>Flower: Bright white with a lilac ring in the centre. Dark blue eye. The reverse of the flower is lilac-blue. Medium-size flower approx. 6-7 cm in diameter with a long shelf life. Good setting of buds and flowers.</p> <p>Growth: Compact with good branching. Needs medium retardation. Dark green small and round leaves.</p> <p>Time of production: Medium.</p>
Sunny® Classic SABRINA	<p>Flower: Warm dark rose with very dark eye. The reverse of the flower is rose with a slightly yellowish glow. Large flowers with a very good shelf life. Excellent setting of buds and flowers.</p> <p>Growth: Compact with good branching. Needs medium retardation. Medium green leaves. Large ruffled wavy leaves.</p> <p>Time of production: Medium.</p>
Sunny® Classic MAXIMA	<p>Flower: Very dark lilac with a reddish touch. Starts with white flowers, which turns colour within 1 - 2 days. The reverse of the flower is dark lilac. Very large flower approx. 8 - 8, 5 in diameter and a good shelf life. Good setting of buds and flowers.</p> <p>Growth: Compact with an excellent branching. Needs medium retardation. Dark green leaves.</p> <p>Time of production: Medium + 2-3 days.</p>
Sunny® Classic MARY	<p>Flower: Bright dark lilac with a touch of red. Blue, dark eye. The reverse of the flower is dark lilac. Medium sized flower approx. 6 cm in diameter and with very long shelf life. Excellent setting of buds and flowers.</p> <p>Growth: Compact growth with very good branching. Needs only medium retardation. Dark green leaves. Unique variety - the leaves do not turn yellow despite the compact growth.</p> <p>Time of production: Fast</p>
Sunny® Classic ELIZABETH	<p>Flower: Old rose with the colour turning brighter towards the centre. The reverse of the flower is light lilac. Large flower, approx. 7.5 cm in diameter and with very long shelf life. Very good setting of buds and flowers continuously.</p> <p>Growth: Strong growth with good branching. Needs medium to stark retardation. Dark, slightly ruffled leaves. Very healthy plant.</p> <p>Time of production: Medium</p>

Osteospermum SUNNY®

Variety Description 2011-2012

Sunny® Classic PHILIP	<p>Flower: White, spoon-shaped flower with good flower leaf volume. The tip of the flower leaves turns a little rose when fully grown. Large, medium blue centre. Large flower of approx. 6.5 - 7 cm when fully grown. Long shelf life. Very good setting of buds and flowers.</p> <p>Growth: Compact growth with good branching. Needs medium retardation.</p> <p>Dark, slightly dented leaves. Good healthy plant.</p> <p>Time of production: Medium.</p>
Sunny® Classic AMANDA	<p>Flower: Burnt yellow turning to white towards the medium blue eye. The reverse of the flower is dark yellow. The flower is medium sized with good shelf life. Excellent setting of buds and flowers.</p> <p>Growth: Compact growth. Needs only little retardation. Dark green ruffled leaves. Good branching.</p> <p>Time of production: Medium to fast</p>
Sunny® Classic HENRY	<p>Flower: Natural white with yellow eye. The reverse of the flower is light yellow. The size of the flower is a little below medium but the variety compensates with producing many flowers at a time. The flowers appear just above the leaves on short, strong stems.</p> <p>Growth: Strong growth. Needs medium retardation. Good branching when bud setting begins. Good setting of buds and flowers.</p> <p>Time of production: Medium.</p>
Sunny® Classic SERENA	<p>Flower: Salmon with dark-blue almost black eye. The reverse of the flower leaves is bronze. Diameter of the flowers 6-7 cm. Excellent setting of buds and flowers.</p> <p>Growth: Compact growth. Needs only little retardation. Dark green ruffled leaves. Good branching.</p> <p>Time of production: Medium.</p>
Sunny® Classic SONJA	<p>Flower: Pink spoon-shaped flower with dark blue eye. Diameter 6-7 cm. Good setting of buds and flowers.</p> <p>Growth: Good growth with good branching. Medium large and dark leaves. Needs medium retardation.</p> <p>Time of production: Medium.</p>
