

Meet us
in Hall 6
Stand No. 6H28

IPM 2019 - INVITATION

After a quick fling with another location, Denmark is back in the fold at its usual place. The hall is now called 6, but you will find us where we always were - right in the middle of the exhibition centre.

Focus will be on Denmark's leading position in the green industry approach. Buzzwords such as waste reduction, MPS, biological pest and disease control and energy savings carry much weight and intersect the industry.

At GASA GROUP, we are constantly developing, renewing and enhancing our offerings to our customers. We want to move ahead together with our customers and would like to take the opportunity to show you the options we have ready for you.

- New app integrated with the web shop - to make your life easier
- Added sales through partnerships - we offer creative input
- From idea to sales - lean back and let us manage the entire value chain
- All of Europe under one roof - we make it easy to think big
- Our new domicile gives new opportunities - come see our new headquarters

We look forward to seeing you.
