# evanthia

## Tropical plants

Catalogue 2023-2024

At Evanthia we do everything we can to get growers off to a good start with a successful crop.

# Pieter Lock

Manager Tropicals / Sourcing at Evanthia

## “Evanthia offers plants from all over the world, with a good dose of expertise and service at your fingertips.”

“The market for green plants is developing rapidly. Tropical houseplants have been trending for a while now and by the looks of it, this will continue to be the case for years to follow. At Evanthia we have noticed this by skyrocketing product demands and the massive growth of our Tropical Plants department in recent years. We support our growers worldwide and team up with retailers, enabling us to develop and learn from each other. Together we are aiming for optimising the market and extending the product life cycle of our products, creating an excellent market position for all parties involved.”

“At Evanthia NO is never an option. We have a strong global network of plant collectors, with valuable partnerships based on many years of close cooperation. They venture out into what are often inaccessible areas and remote corners in their quest to find the best seeds. We work with different production locations all over the world and manage all processes for producing high quality starting material for commercial production. Moreover, Evanthia’s product range is so wide, you will be amazed by the opportunities and great alternatives in case of an unforeseen shortage of a certain product.

In this new catalogue you will find the highlights of our product range. From Alocasia to Zamia, you

will find it at Evanthia. Looking for a specific species or variety that is not mentioned in our catalogue or on our website? This doesn't mean we can not get our hands on them too! We have the connections and are happy to team up with you to make a planning for your unique product range.

Evanthia has become a one-stop-shop for anyone who has or wants to start a business in tropical plants. It all starts with a tiny little seed or young plant. We offer raw seeds and optimise seeds ourselves with special coating or pelleting. For some seed items it may be more challenging to grow young plants yourself than for others. Evanthia has lots of experience and can supply young plant

material from seeds, even for the most difficult-to-germinate products like Strelitzia. In addition to seed-raised items, we offer a wide range of products as tissue culture young plants. Tailored technical advice and personal service are a natural part of our partnership with you.

Let’s continue to share our mutual knowledge and experiences with green plants and identify trends in the market together. This will enable us to offer new, successful products and to connect with parties throughout the entire chain.”

# Pieter’s personal favourites

Pieter Lock travels the world to select the best sources for our extensive product range, featuring high demand, extraordinary and rare items. Evanthia’s customers can count on our solid network and stable supply. Let’s take a closer look at a few of Pieter’s personal favourites.

### 1 Alocasia

If I should name one product group that has immensely developed within our range of tropical plants, it is for sure Alocasia. This season we extended our commercial Alocasia collection with lots of exciting items! Take a look at the tiger striped stems, nearly black leaves, metallic shine and distinctively coloured leaf veins on our new items. For sure they will inspire you. Find our Alocasias on pages 8 and 9.

### 2 Calathea

Calathea truly earns its nickname as 'living plant', as it closes or rises its leaves at night and uncurls or lowers them again in the morning. Especially for the varieties with distinctive patterns or leaf colours on topsides and reverses, this funny night habit gives an even more significant effect. View our Calathea range on pages 14 and 15.

### 3 Coffea arabica

In itself, Coffea arabica is already a gorgeously glowing houseplant: compact, bushy with attractive shiny, dark green leaves. With excellent consumer care it might even produce its scented flowers and coffee bean containing fruits. Opportunities are endless as Coffee Culture is trending. It goes beyond the daily ritual, and this gives the Arabic coffee plant so many leads to build creative marketing concepts. Page 13.

### 4 Cordyline

Spectacular vibrant foliage to shine throughout the year. Our frost tender collection of Cordylines, features various striking colours and are tough enough to handle drought and cool circumstances. They make for great low maintenance, care-free houseplants and are well-suited to offer in patio containers as well as for landscaping. Discover the line-up on pages 16 and 17.

### 5 Eucalyptus

Stunning pale to bluish-green leaves, neat and airy branches, a lovely aromatic scent... Eucalyptus fits perfectly into today’s bouquets and displays and is a preferred item for commercial production of both cut foliage and pot plant production. From E. cinerea to E. globulus and from E. citriodora to E. websteriana... with over 10 different species, there is lots to choose from. More info on pages 18 and 19.

# Alocasia

Alocasias are fashionable exotics with impressively large leaves on sturdy stems. Evanthia offers an interesting line-up of varieties, each with its own characteristics. Foliage and stems vary in terms of texture, shape, size and colour. With the right care, Alocasia is one of the fastest-growing houseplants out there. Our Alocasias are available as tissue culture young plants with a rapid growth cycle.

NEW

**Alocasia x cuprea Silver Dragon**

- Compact habit
- Silver/grey leaves with dark green veins
- Leaf backsides have red veins

NEW

**Alocasia cuprea Red Secret**

- Eye-catching, metallic shiny leaves
- Copper to dark red colour

**Alocasia cucullata**

- Compact habit
- Bright green, heart-shaped leaves

**Alocasia lauterbachiana**

- Spear-shaped, long and slender leaves with wavy edges
- Dark green to purple topsides and reddish reverses

NEW

**Alocasia macrorrhiza Stingray**

- Extraordinary stingray leaf shape
- Fresh green colour

**Alocasia Sarian**

- Arrow-shaped leaves with wavy edges
- Dark green foliage with striking light coloured veins

NEW

**Alocasia Black Velvet**

- Compact habit
- Large, thick, velvety leaves
- Very dark green leaf colour with striking silver veins

NEW

**Alocasia x cuprea Dragon Scale**

- Compact habit
- Remarkable, large arrow-shaped leaves
- Green/silver leaves with dark green veins
- Leaf backsides have red veins

NEW

**Alocasia micholitziana Frydek**

- Deep green leaves with bright with veins
- Velvety leaf texture

NEW

**Alocasia Tigrina Superba**

- Voluminous plants
- Stems with extraordinary tiger stripe print
- Large pointy leaves

**Alocasia zebrina**

- Distinctive zebra-striped pattern on its stems
- Large arrow-shaped, glossy leaves

NEW

# Asparagus

With Asparagus fern you can go in so many different directions, it might dazzle you. Asparagus is a true all-rounder, reliable, easy to grow and useful in a wide variety of situations... not to mention all the different shapes, forms and growth habits.

As one of the fastest growing and least demanding plants, these glorious greens are highly adaptable to various climates. They are fairly drought tolerant and can handle relatively cool temperatures and shady to bright light conditions (avoiding direct sunlight). You can grow them as long-lasting cut foliage, in pots and even – since some are quite root hardy – for landscaping. Go for a hanging or upright focal point and pick sturdy or soft and fuzzy items for your range. There is so much to choose from.

Evanthia offers starting material in the widest range of ornamental Asparagus and has build up a lot of technical knowledge and experience, to help you get started.

**Asparagus densiflorus Cwebe**

- Finely textured compact plant with an upright habit
- Needle-like foliage that turns more reddish/copper over time
- Decorative houseplant and cut foliage

**Asparagus densiflorus mazeppa**

- Low-growing with compact habit
- Robust Asparagus with arching woody stems and fine fern-like leaves
- Suited as houseplant and garden plant

**Asparagus densiflorus meyerii**

- Bushy, compact plant with upright habit
- Long, plume-like stems, resembling foxtails
- Can be used as houseplant, garden plant, in hanging baskets or as cut foliage

**Asparagus densiflorus myriocladus**

- Finely textured with a bushy, compact habit
- Strong woody stems and fluffy bright green tufts
- Can be grown as houseplants and cut foliage

**Asparagus densiflorus Sprengerii**

- Upright habit, later on more cascading
- Long arching branches filled with delicate, feathery foliage
- Great for indoor and outdoor pots, in hanging baskets and as cut foliage

**Asparagus falcatus**

- Robust plant with vigorous growth
- Dark green, sickle-shaped leaves
- Can be used as houseplant and cut foliage

**Asparagus medeoloïdes smilax**

- Low growing, with a climbing and creeping habit
- Distinctive, tiny oval-shaped leaves on long trailing branches
- Suited as hanging plant, a guided climber and cut foliage

**Asparagus setaceus plumosus nanus**

- Fast-growing, with an extensive climbing habit
- Delicate appearance with tiny, fine needle-like leaves
- Great as houseplant and cut foliage

**Asparagus setaceus Pyramidalis**

- Bushy, upright habit with a dense pyramid-like growth
- Forms shoots of lacy, fern-like plumes
- Makes for a great houseplant

**Asparagus virgatus**

- Bushy, well-branching with an upright habit
- Tiny, soft thread-like leaves arranged like little brooms at the stems
- Mainly grown for cut foliage production

## Agave

NEW

*Agave attenuata*

- Decorative Agave with smooth, thornless leathery leaves
- Fast-growing variety with light green to bluish colour
- Forms a trunk over time while shedding old leaves

## Billbergia

NEW

*Billbergia nutans*  
Tears of Joy

- Robust, frost-tender garden plant
- Flowering in late spring
- Extraordinary inflorescence with pink bracts a blue flowers
- For Europe exclusively available at Evanthia

## Alpinia

*Alpinia zerumbet* Variegata

- Vibrant green and yellow striped leaves
- Uniform plants that easily form shoots
- Resistant to most pests and diseases

## Araucaria

*Araucaria excelsa*

- Decorative, pine-like evergreen foliage
- Easy to grow and adaptable to various climates
- Ask our team for the timing of new harvest

## Beaucarnea

*Beaucarnea / Nolina recurvata*

- Robust, drought-tolerant semi-succulent
- Decorative fountain-like leaves
- Tolerant to a wide range of growing conditions

## Chamaedorea

*Chamaedorea elegans collinea*

- Compact, slow-growing palm
- Fresh green feather-shaped foliage
- Great adaptability

## Chlorophytum

*Chlorophytum ochidastrum*  
Princess Mabel

- Striking foliage plants with orange stems and deep green leaves
- Upright, clump forming habit
- Easy care, air-purifying houseplant

## Coffea

*Coffea arabica*

- Bushy and compact coffee plant
- Decorative shiny bright green foliage
- Interesting plant with a great story to tell

# Calathea

Discover Evanthia's bold line-up of Calathea beauties and select the showstopping items that will uplift your entire collection. We offer great varieties with striking leaf colours and patterns.

Most Calatheas earn the nickname 'living plant' or 'prayer plant', because they close or rise their leaves at night and uncurl or lower them again in the morning. Especially with these stunning leaf patterns and contrasting backsides

this funny nocturnal feature is truly special.

With such a wide range of varieties there are significant differences in growth habits, plant size and volume. In order for all items to reach their full potential, it is important to choose a fitting pot for every variety. Check our website for more information on variety level or ask our team of experts for advice, while composing your own range of Calatheas.

Eucalyptus websteriana

## Fatsia

- Relatively easy to grow
- Large, decorative deeply lobed glossy leaves
- Versatile as garden plant, container plant and house plant

Fatsia japonica

Fatsia japonica Spider's Web

Fatsia japonica Variegata

## Grevillea

Grevillea robusta

- Decorative, fern-like evergreen foliage
- Easy to grow and adaptable to various climates
- Well-suited as a hedge, full grown tree, container plant and low growing house plant

# Hypoestes

- Decorative, colourful blotched foliage
- Easy to grow and quick to finish
- Great for mixed displays indoors and outdoors

Hypoestes  
phyllostachya Compact Pink

Hypoestes  
phyllostachya Compact Red

Hypoestes  
phyllostachya Compact Rose

Hypoestes  
phyllostachya Compact White

# Monstera

Monstera is a remarkable statement plant and enjoys extreme popularity. Its striking leaves instantly impress and inspire. With aerial shoots and a strong climbing habit it takes over any interior, turning it into a true tropical decor.

*Monstera deliciosa Tauerii* has large, heart-shaped leaves with lots of perforations and notches. Tauerii is a dwarf-type *Monstera deliciosa* and develops its leaf perforations particularly early. This plant tends to set earlier than other Monsteras. It's great for both cut foliage and potted plant production and available as seeds and young plants from seed.

*Monstera adansonii* is smaller than the dwarf type *Monstera deliciosa* and has fresh green, heart-shaped leaves. Unlike other Monsteras, *M. adansonii* only develops leaf perforations and no leaf notches. The holes are visible at a very early stage. Evanthia offers *Monstera adansonii* as tissue culture young plants.

We have *Monstera deliciosa* also available as tissue culture young plants.

*Monstera adansonii*

*Monstera deliciosa Tauerii*

# Musa

Musa  
**acuminata Dwarf Cavendish**

- Dwarf-type banana with a compact habit and a short trunk
- Huge, paddle-shaped green leaves with reddish blotches
- Produces small edible bananas over time
- Mostly grown for indoor use

Musa  
**basjoo**

- Cold-tolerant banana with a vigorous growth habit
- Slender reddish trunk with huge, shiny green leaves
- Great for borders or container plantings and landscaping
- Produces small, inedible bananas over time

Musa  
**Oriental Dwarf**

- Compact habit with a symmetrical growth
- Thick stem full of large bright green leaves
- Well-suited as air-purifying houseplant

Musella  
**lasiocarpa**

- Dwarf banana with a conical trunk
- Grey/green, leathery leaves and large, fragrant flowers in spring/summer
- Great for landscaping and patio containers

# Pachypodium

Musa  
**ensete Maurelii**

- Vigorous growth habit
- Large upright leaves with a dark reddish colour flow
- Ideal for patio containers and landscaping

Pachypodium  
**lamerei**

- Decorative, easy to grow succulent
- Tolerant to a wide range of growing conditions
- Well-resistant to pests and diseases

# Philodendron

Philodendrons are true tropical beauties with many different appearances, sizes, shapes and colours. Our Philodendron range contains climbing varieties, with long woody stems and highly decorative leaves and non-climbing varieties with a bushy, upright habit. They

make for stylish, low-maintenance houseplants with great air-purifying qualities. Evanthia has a broad range of Philodendron varieties available as seed and young plants from seed or tissue culture. Check our website or ask our team for our Philodendron cultivation manual.

**Philodendron Xanadu**

- Upright, bushy habit
- Compact and tidy appearance
- Large, elongated oak-like, deep green leaves with wavy edges

**Philodendron selloum Hope**

- Dark green, glossy, ruffled foliage
- Excellent basal branching and a neat appearance
- More resistant to bacterial diseases
- Leaves turn deeply lobed at an early stage

**Philodendron Imperial Green**

- Densely growing, leathery leaves fan out from the centre
- Large, oval-shaped foliage with a fresh lime-green colour
- Non-vining, self-heading with a compact habit

**Philodendron Imperial Red**

- Densely growing, leathery leaves fan out from the centre
- Colour starts bright reddish/green and turns more dark over time
- Non-vining, self-heading with a compact habit

NEW

**Philodendron Prince of Orange**

- Oval-shaped leaves change colour over time
- Varying from yellowish to bright orange and copper to dark green
- Compact, upright habit

**Philodendron Florida Beauty Green**

- Rich green, very deeply incised leaves
- Strong climbing and spreading habit

**Philodendron hastatum Grey**

- Strong climbing habit
- Elongated, shiny leaves
- Colour-changing from pale grey to dark green to metallic bluish

NEW

**Philodendron Fuzzy Petiole**

- Large heart-shaped leaves and hairy, reddish stems
- Climbing habit

**Philodendron bipinnatifidum Shangri-La**

- Quick to finish split-leaf Philodendron from tissue culture
- Bushy, robust plant with lots of stems
- Non-vining, self-heading variety with a compact habit
- For Europe exclusively available at Evanthia

**Philodendron Fun Bun / Green Wonder**

- Long, slender stems with a fan of broad, green leaves on each stem
- Hand-shaped leaves grow wide apart, creating lots of volume quickly

**Philodendron selloum**

- Vigorous, non-vining growth habit
- Large, deeply lobed leathery leaves
- Can grow to colossal size

**Philodendron minima**

- Vining, with a very vigorous growth habit
- Heart-shaped, deeply cut, glossy green leaves
- Great for hanging baskets or trained along a moss pole

**Philodendron bipinnatifidum Atom**

- Non-vining with a compact, upright habit
- Leathery dark green leaves with a firm structure
- Wavy-edged leaves become more lobed over time

**Philodendron selloum Narrow**

- Long, narrow green, heavily serrated leaves
- Easy care, self-heading Philodendron

NEW

Philodendron  
Erubescens Pink Princess

- Wonderful dark green and pink variegation
- Climbing habit

NEW

Philodendron  
Erubescens White Princess

- Remarkable dark green and white variegated leaves
- Climbing habit

Philodendron  
Zebra

- Remarkable white stripes on dark green oval leaves
- Leaf pattern intensifies with age
- Non-vining, compact habit

## Peperomia

- Compact habit
- Attractive, distinctive foliage
- Easy care, air purifying house plants

Peperomia  
clusifolia Red Margin

Peperomia  
polybotrya Raindrop

## Pilea

Pilea is widely appreciated for its extraordinary leaf shapes, textures and colours.

It has for sure the interest of the new generation plant buyers and tropical enthusiasts, which results in a fixed high ranking on top houseplant charts. Take the coin-shaped leaves of the Pilea peperomioides, the Moon Valley with its quirky textured leaves or the remarkable, variegated Silver Tree. Grow them together in smaller pot sizes for an irresistible display on the shop floor.

NEW

Pilea  
Moon Valley

Pilea  
peperomioides

NEW

Pilea  
Silver Tree

## Radermachera

Radermachera  
sinica

- Decorative with lots of shiny green foliage
- Fast-growing, compact and bushy plant
- Grown as a compact house plant, as a bonsai or with a tall trunk

## Stromanthe

Stromanthe  
sanguinea

- Robust plants with a strong compact habit
- Green upper leaf top sides, red reverses
- Great to combine with Calathea and Ctenanthe

## Strelitzia

Strelitzia, a.k.a. Bird of Paradise, is a popular subtropical foliage plant, well-known for its exotic large, upright, banana-like leaves and extraordinary flowers. It makes for a great houseplant and can be used outdoors during warmer periods as well.

*Strelitzia reginae* is the most common and widely used Strelitzia for pots and cut flower culture. It grows striking orange/blue flowers nestled within its greyish green leaves. 'Mandela's Gold', formerly known as Kirstenbosch Gold, is a rare reginae type Strelitzia with yellow/blue flowers.

*Strelitzia nicolai* has a somewhat different plant structure. The leaves of *S. nicolai* are fewer but larger than the reginae types. It has blue/white flowers. Strelitzia's long-lasting flowers usually appear 3 to 5 years after germination.

Evanthia has Strelitzia starting material available all year round, as seed and young plants from seed. Growing plugs from Strelitzia seeds can be quite challenging. Evanthia has tons of experience and is happy to do the work for you. For a quick and easy start, order Strelitzia young plants. Ask our team for the Strelitzia cultivation manual for commercial production.

## Schefflera

- Lots of glossy foliage
- Easy care, formable houseplant
- Adapts well to various conditions

Schefflera  
actinophylla

Schefflera  
arboricola

Strelitzia  
nicolai

Strelitzia  
reginae

Strelitzia  
reginae
