Exploring an organic wonderland

We make
wonders

WELCOME TO HISHTIL'S ORGANIC WONDERLAND

Hishtil is here to prove that with an inventive R&D department, years of experience, and a hint of magic, the organic world can be an amazing playground.

Hishtil invites you to discover a new and mesmerizing world of unbelievable organic wonders. All it takes is one leap of faith and a turn of the page.

ORGANIC LAVANDULA

Lavandula angustifolia
'Forever Blue'^P

Lavandula stoechas
'Kew Red'

Lavandula angustifolia
BeeZee™ 'Dark Blue'^P

Hishtil's organic lavender assortment - which includes two species, *angustifolia* and *stoechas* - was developed over ten years and includes cultivars especially suited to organic cultivation, with high performance and plenty of flowers that will attract and keep the bees busy during the long flowering seasons.

Our many years of experience and great success in organic cultivation of a wide range of herbs, have provided the skills and knowledge to add *Lavandula* to this exciting product range. We are devoted to providing a wide variety of organic products, and will add more lavender species and varieties in organic specification in the near future.

ORGANIC GRAFTED VEGETABLES

At Hishtil, we aim for perfection, creating a combination of desirable fruit with fast root development and disease resistance, and in addition to which, organic!

Organic grafted plants are healthier, free from chemical residues, and their production is less polluting for the environment. They can guarantee a good ROI due to high survival rates, rapid root development, and improved water efficiency, all leading to less polluting for the environment. In addition to which they offer high yields, rapid root development, improved drought tolerance and water efficiency, and outstanding disease tolerance.

Thanks to our groundbreaking work over the years, and our exceptional vegetable propagation protocols, we are one of the largest grafted plant producers in the world. We have the ability to supply organic grafted vegetables with minimum residues levels.

ORGANIC HERBS

The leaves, flowers, roots and seeds of herbs are fundamental ingredients in many recipes, and as well as culinary and aromatic uses, they have a valuable role in medicine. Whether consumed fresh or dried, organic herbs are widely considered to be healthier for consumers, and better for the environment due to minimum residues levels.

At Hishtil, we offer a vast assortment of organic herbs, such as basil, mint, oregano, sage, thyme and many more.

ORGANIC SWEET POTATO

Ipomoea batatas aka the sweet potato, is a perennial cultivated around the world for its edible tuberous roots. The tubers can be eaten baked or boiled, fried or dried. The leaves of Treasure Island series are also edible and feature in many recipes.

Although *Ipomoea* are not known for their flowers, their heart-shaped, colourful leaves make them a pretty addition to the vegetable garden. In traditional medicine the leaves are a remedy for asthma, bug bites, burns, fever, nausea, stomach distress, and more.

All of Hishtil's sweet potato varieties are organic. You read that right. All are produced to organic specification. We supply them as young plants to save time and provide good acclimation in the field, in a plant pot and even the yard to to minimize losses, and maximum performers.

Among our *Ipomoea*, one can find selections with high sweetness, coloured skin and flesh, and the highly ornamental Treasure Island series with seductive leaf shapes and colours.

At Hishtil, we make sure our products meet the strictest international standards.
